Beauty and Function
Made Simple

Wood-Ultrex® Series

**A star performer
designed for
excellence.**

The Integrity from Marvin® Wood-Ultrex Series windows and doors feature exteriors of Ultrex fiberglass and beautiful, real-wood interiors. Setting new standards in low maintenance and top aesthetics, Integrity® Wood-Ultrex series provides the most popular styles of windows and doors and improves them with Ultrex durability, elegant wood interiors and standard, ENERGY STAR® qualified performance. Explore the range of options that make an Integrity window the perfect fit for you.

At Integrity®, sustainability is part of the manufacturing philosophy: make a product able to withstand the power of the great outdoors, while preserving the natural resources from which it was made.

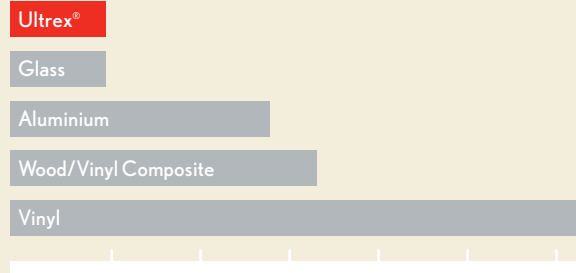

- Ultrex® fiberglass is made from silica sand, a safe and renewable natural resource.
- Ultrex requires 39% less energy to produce than vinyl and the Ultrex manufacturing facility captures and destroys 95% of all Volatile Organic Compounds (VOCs).
- The Ultrex manufacturing facility fully complies with the 1990 Clean Air Act and has been designated as a Maximum Achievable Control Technology (MACT) facility as outlined by the Environmental Protection Agency (EPA).
- The glass in our products contains 15%-33% recycled content.
- Integrity products offer ENERGY STAR® qualified performance.
- Even more green awards and information can be found at IntegrityWindows.com.

EXPANSION MEASUREMENT

SHORTER IS BETTER

Comparison of expansion and contraction

STIFFNESS MEASUREMENT

LONGER IS BETTER

Average Modulus

Superior in every way.

- Low-maintenance, high-durability Ultrax has low conductivity, offers unmatched strength and is corrosion resistant.
- Patented Ultrax premium finish offers superior performance, reducing chalking, fading, scratching, UV degradation and worries.
- Unlike vinyl, which can distort in extreme heat or streak and crack in fluctuating temperatures, Ultrax expands at virtually the same rate as glass, so the entire window stays tightly sealed, with no leaks, seal failures, or stress cracks over the long term.
- 15+ years of proven experience have led to superior tooling and fabrication capabilities, meaning all Ultrax parts are optimized for performance requirements.
- Benefit from exceptional fit and finish, including detailed profiles, radius profiles and clean, balanced sightlines for an architecturally inspired appearance.

8X
MORE RIGID
THAN VINYL

Designed to outlast and outperform.

THE WOOD-ULTREX SERIES

Rest assured.

SIMPLE AND EFFICIENT INSTALLATION

- Installation Accessories
- Preattached folding nailing-fins
 - Factory-applied jamb extensions
 - Integral corner keys

Factory Mulling for our most popular configurations or Field Mulling Kits make multiple assemblies and combinations easy.

DELIVERED
ON TIME
99%
OF THE TIME

Your Integrity products are delivered in 10 calendar days making your project run smoother. Ten years of an on-time record is something you can count on.

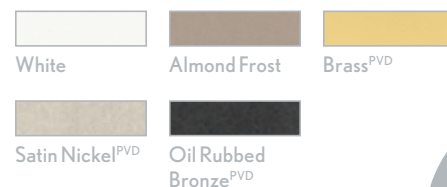

Plus, at no extra cost we can ship your factory-installed screens separately. (Factory installed screens are a standard offering on operating windows.)

Options that make the difference.

FINISHES

HARDWARE

Integrity hardware is available in five finishes. PVD metal finishes are standard for doors.

833%
LESS
EXPANSION
THAN VINYL

GLAZING

Every window and door comes standard with LoE²-272[®] insulated glass with Argon, and optional LoE³-179[™], or LoE³-366[®] for superior performance and long-term energy cost savings.* Tempered and tempered obscure glass is available.

* Argon gas not available in high elevations where capillary tubes are required.

DIVIDED LITES

Simulated Divided Lites (SDL) are bars permanently adhered to both sides of the glass for a more authentic divided lite appearance both inside and out. SDL is available with or without spacer bar.

Wood Interior Grilles provide the rich warmth of real wood while concealed contact points allow for easy removal and cleaning.

Profiled Grilles-Between-the-Glass with or without spacer bar (GBG) are available in several lite cut variations; including Rectangular, Prairie, 2w2h, 2w1h and Equal Lite for design flexibility.**

** Not available in polygons except direct-glaze rectangles.

Proprietary pultrusion technologies deliver **PROVEN COMPOSITE PERFORMANCE**

Pultruded fiberglass
Thin strands of strong glass cable, saturated with compounded resins to create a durable material.

Integrity Ultrax exterior
The patented finishing process applies an impermeable factory finish up to 3x thicker than competitive finishes, making Ultrax 5x more resistant to ultraviolet (UV) degradation over time. Available in Stone White, Pebble Gray, Cashmere, Bronze or Evergreen. It can be painted with no impact on its protective properties.

Integrity Ultrax construction
The patented and advanced thin wall construction technologies of Ultrax allow for detailed profiles and component optimization.

Integrity Wood-Ultrax Series interior
Selected solid pine wood, classically detailed and milled to satin smoothness, ready for stain or paint. Also available with optional white interior finish.
